Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 26-28 and 39 drawn to a windmill with rotating permanent magnets and coils.
 - II. Claims 13-16, drawn to a generator installation onto a windmill.
 - III. Claims 17 and 18, drawn to electro-mechanical converter structure.
 - IV. Claim 19, drawn to an alignment of permanent magnets.
 - V. Claims 20 and 21, drawn to electro-mechanical converter coil structure.
 - VI. Claim 22, drawn to windmill structural details.
 - VII. Claims 23-25, drawn to electro-mechanical converter with repelling magnets.
 - VIII. Claims 29-36, drawn to a power generator air path structure.
 - IX. Claims 37 and 38, drawn to a heat exchange system.
2. The inventions are distinct, each from the other because of the following reasons:
Inventions of Group I through IX are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects.
(MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, functions and effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Sheridan Neimark on January 17, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made because applicant(s) requested to provide a written Election/Restriction requirement.

Applicant(s) are advised that reply to these requirements to be complete must include an election of the invention to be examined including a statement if it is done with or without traverse (37 CFR 1.143).

Conclusion

5. When the claims are amended, applicant(s) should state in detail where in the original disclosure or in the drawings the amended features find support. No new matter may be introduced.
